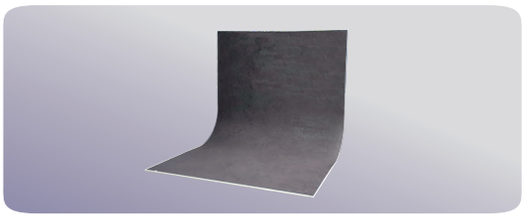
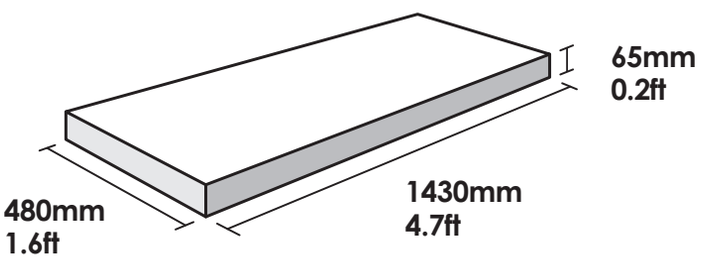
Easiframe® Curved Instructions



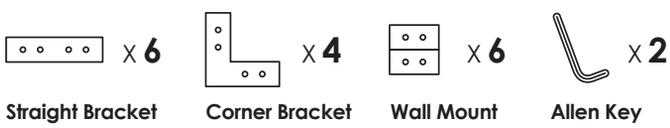
Australian Patent Granted 2020: **2020100590**	US Patent Pending: **16/911,319**	UK Patent Pending: **2009816.6**	Canadian Patent Pending: **3,085,076**

Packaging

Dimensions:



Contents



Straight Bracket | **Corner Bracket** | **Wall Mount** | **Allen Key**

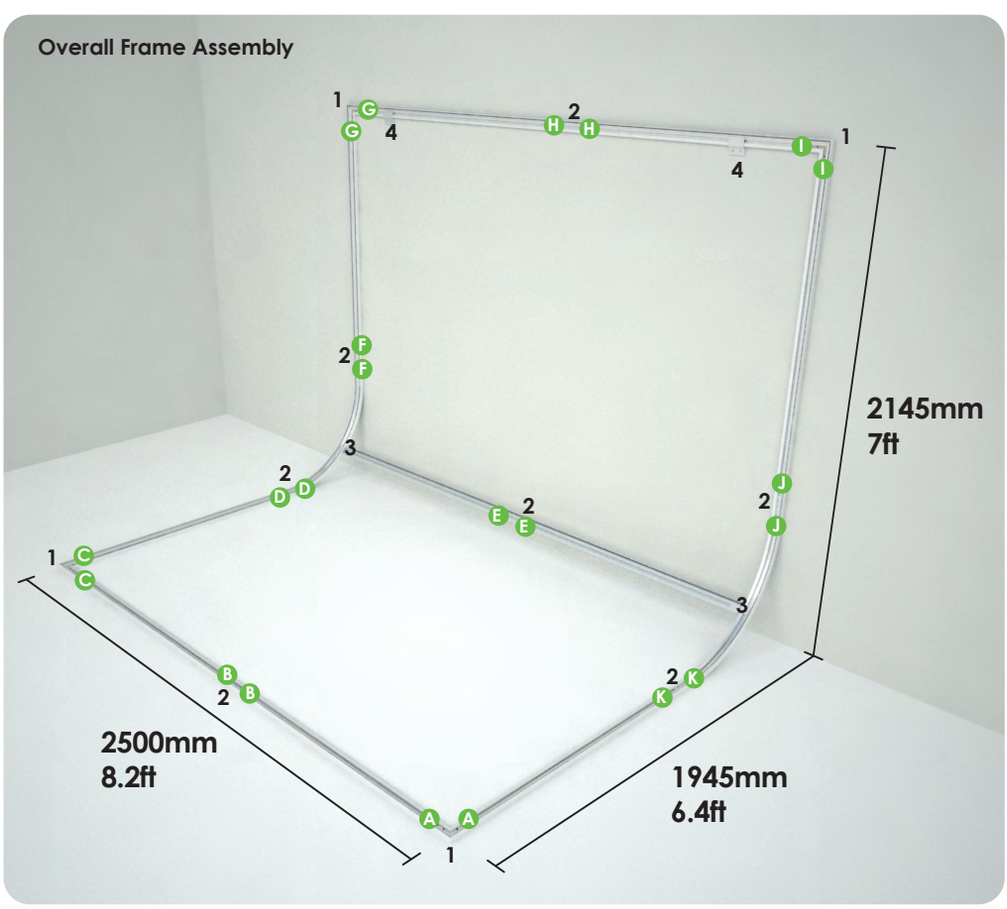
Weight:

Easiframe Curved: **10kg / 22lbs**

Fabric Skin: **5kg / 11lbs**

Total: **15kg / 33lbs**

Frame Assembly



The **Easiframe® Curved** is labelled on each joint with a green dot . Please ensure that the same labels are connected **(A + A - B + B etc.)**
All joints require an Allen Key to tighten which is supplied.

Please Note: Green dot labels are stuck to the **BACK** of the frame. *Once in place, frame peices will need to be **TURNED OVER** to connect the joints.*

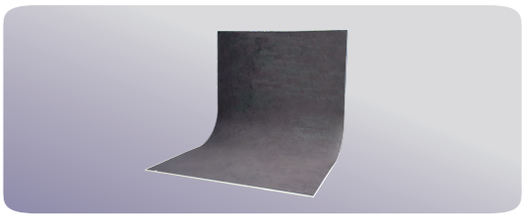
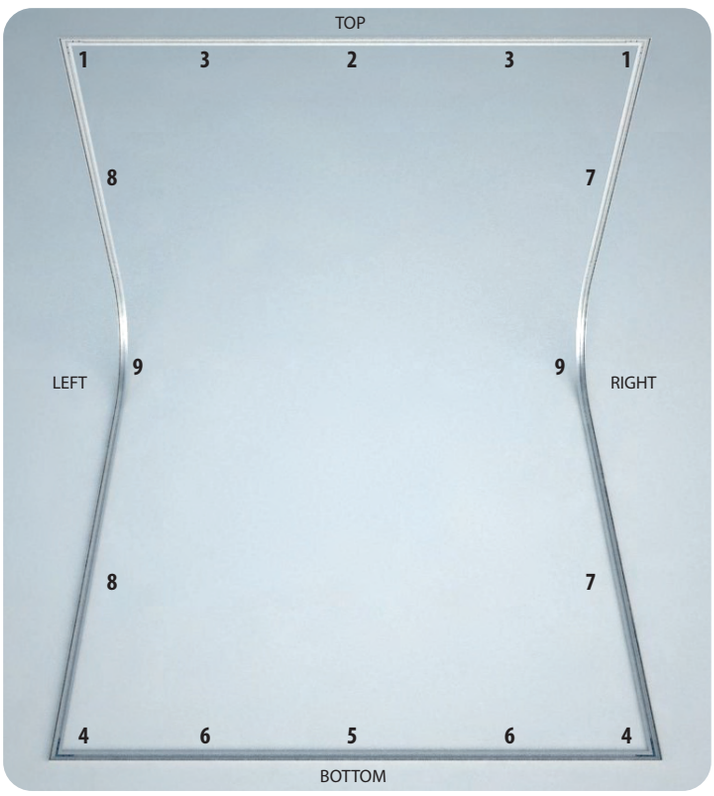
Easiframe® Curved Instructions



Fabric Insert



To install the fabric skin correctly, start by inserting the fabrics silicone edge into the top two corners, then into the middle and finish the remaining section of the top.

Repeat the same process for the bottom section and then the sides.

Please refer to the diagram - Starting from '1'

Insert silicone edge into the frame sewn side down. When inserted correctly, you should not be able to see the sewing.
