Charging and Installing the Battery

Use the multivoltage charger that's included with the Cruiser TTL 500.

Note: Impact recommends fully charging the battery before its initial use and after an extended period of inactivity (more than two months).

To charge and then install the battery, follow these steps:

1. Plug the AC cord into a wall outlet. The charger's indicator light will glow green when the charger is receiving power.
2. Connect the DC cord to the battery. The charger indicator light will glow red when the battery is charging, and green when the battery is charged.
3. Install the battery by orienting the contacts on the inside edge of the battery with the contacts in the battery compartment. Press it down into the battery compartment until the locking buttons click shut.

Checking the Battery Level

When the battery is installed in the Cruiser, the remaining charge is always displayed by the battery icon on the LCD screen.

If the battery is not installed, check the battery level by pressing and holding the charge indicator button. The indicator lights will show the remaining charge.
