DIMENSIONS & WEIGHT CAPACITY

Total standing desk converter weight capacity is 33lbs* (desktop + keyboard tray.)
Keyboard tray weight capacity 5lbs max.
*Maximum weight capacity is 45lbs. 33lbs capacity is the maximum recommended load considered safe for raising and lowering the standing desk converter. The desk is capable of handling heavier monitors and computers if the user is capable of lifting and lowering the converter.

⚠ WARNING

PINCH POINT

DO NOT place hands on or near support bars. Pinch points are created during lifting and lowering the worksurface. Failure to follow these instructions may result in serious personal injury.

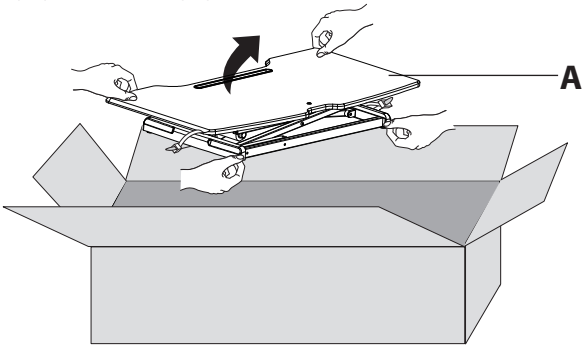

Step 1

Remove the Desk Converter from the Box

Remove the Desk Converter (#A) from the packaging.

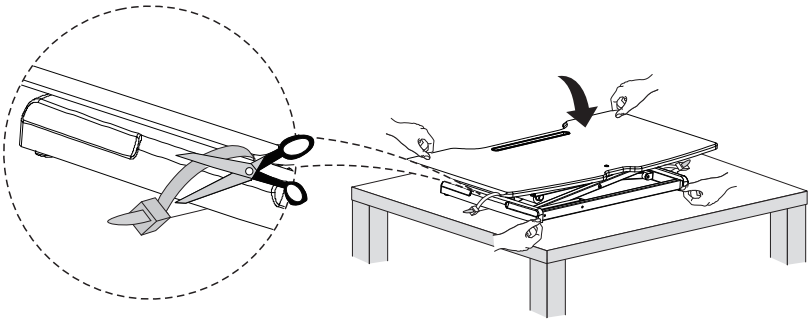

Note: Two person lift recommended.

Step 2

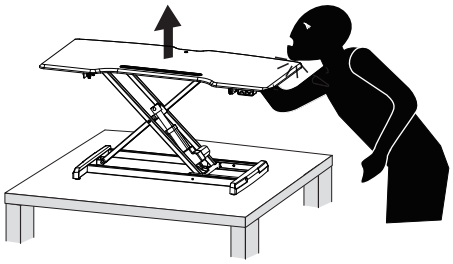

Place it on a level surface **(such as a desk, table, or the floor)**

Locate the plastic ties on the Desk Converter, there will be one on each leg.
Use a pair of scissors to cut the plastic ties.

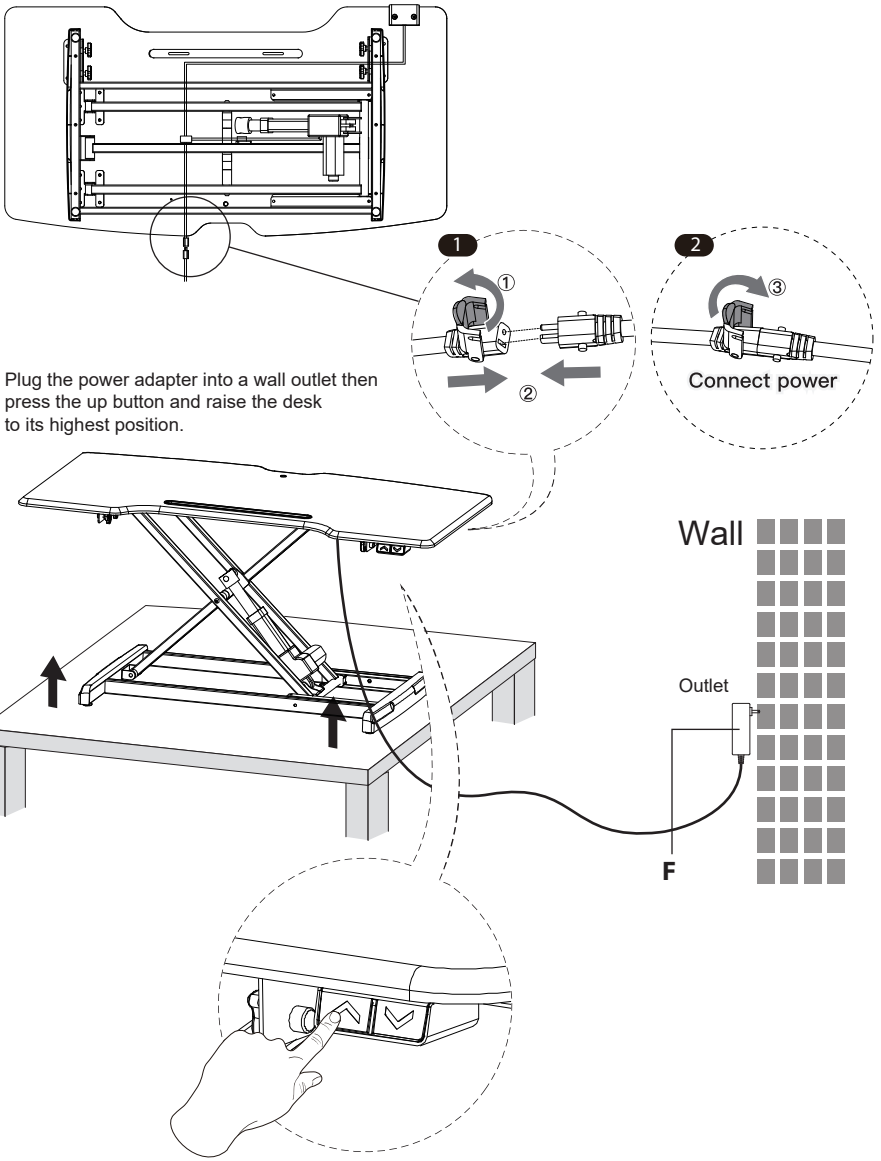

Take care not to stand or lean directly above the product, and ensure your hands and fingers stay clear of the mechanism, as the product may be under pressure and might rise suddenly.

Step 3
Raise the Desk Converter

Connect the power cord on the desk converter to the power adapter.

Plug the power adapter into a wall outlet then press the up button and raise the desk to its highest position.

Step 4

Attach the Keyboard Brackets

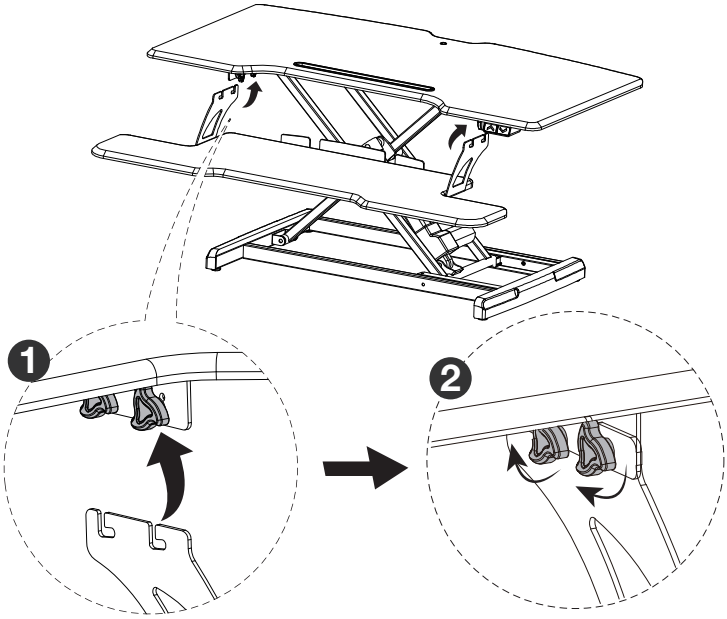

Attach the Keyboard Tray Brackets (#C) to the bolt holes on the underside of the Keyboard Tray (#B) as shown, using the Bolts (#D).

Step 5

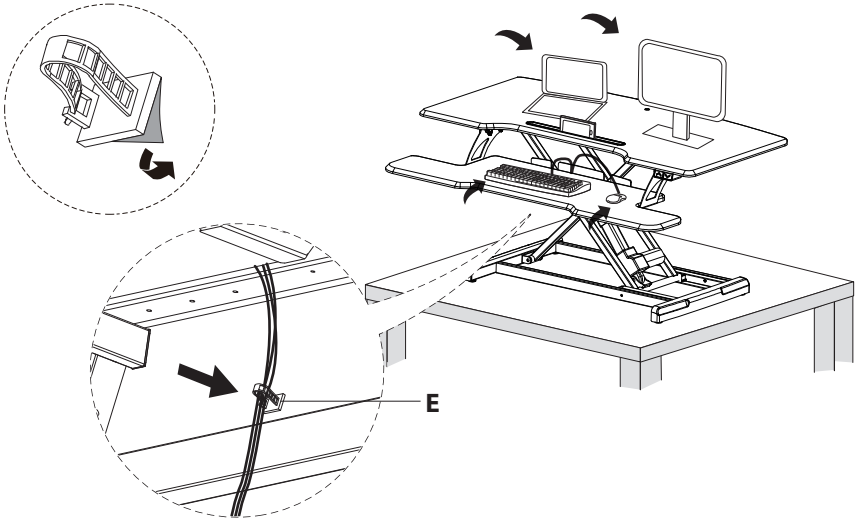

Attach the Keyboard Tray

1.Attach the Keyboard Tray by sliding it beneath the bolts shown in magnification bubble 1. Ensure the bolts reach the end of the channels on the bracket, by lifting the tray up unto the bolts and pushing it forward.
2.Tighten the knobs by hand until secure.

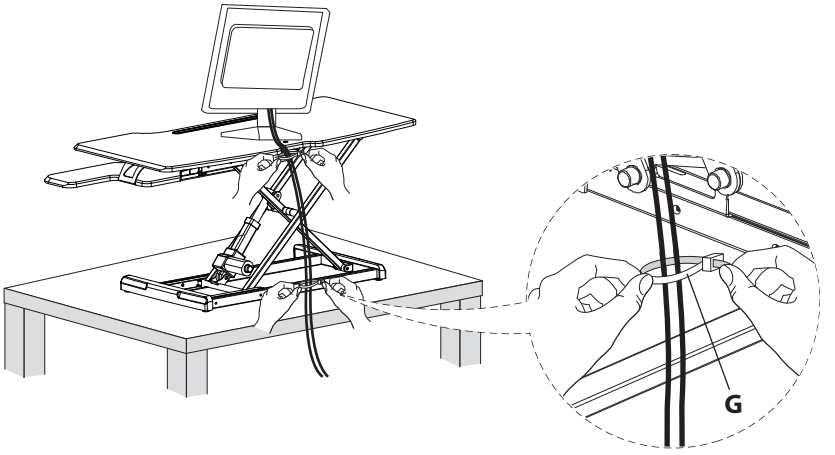

Step 6
Place Items on the Desk Converter

Place all monitors, laptops, or other equipment on the desk. Ensure none of the equipment is hanging off the edge or otherwise unstable/unbalanced. Refer to the warnings section at the end of the manual for further information on equipment placement.

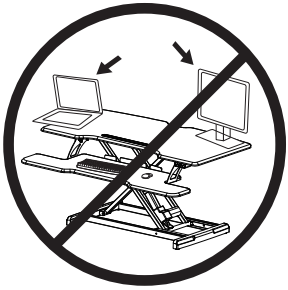

Step 7
Worksurface Cable Management

(Optional Step) Use the provided Cable Ties (#G) to collect cables for all peripheral devices on the worksurface. **Ensure that enough slack is left in the cables so that they do not pull any devices when raising or lowering the desk.**

Warnings

Keep all monitors, laptops and other equipment fully on the work surface at all times. Allowing any part of these to hang off the edge may result in property damage and/or personal injury.

Raise the work surface slowly. Raising the work surface too quickly may cause monitors, laptops and other equipment to fall resulting in property damage and/or personal injury.

Ensure that enough slack is left in the cables so that they do not pull any devices when raising or lowering the desk and allow for the full range of vertical motion (19.3"). Failure to provide sufficient cable length may result in property damage or personal injury.

To avoid the potential to pinch cables in the mechanism it is important to follow the cable routing examples in this manual. Do not allow cables to pass through or rest upon the legs. Failure to follow these instructions may result in equipment damage or personal injury.
