Thank you for choosing Sensei Pro

The Sensei Pro Magnetic Filter System helps you avoid the inconvenience of constantly screwing filters on and off your lens. Screw a **filter adapter ring** onto each of your filters, and magnetically attach them to the **lens adapter ring**. Use the **magnetic lens cap** to protect your lens from scratches and dust. To protect your filters during storage or transport, magnetically attach the **rear filter cap**, and cover the front of the filter with the **lens cap**.
