Introduction to P671-CB

P671-CB (carbon fiber overlay version)

Description:

P671-CB is fitted with a front flipper and ambidextrous thumb stud design. Although the blade is compact, it has a built-in ball bearing structure for smooth deployment of the blade. It is a convenient and practical, portable spare knife.

Specification:

Overall Length: 164mm/ 6.46”

Blade Length: 70mm/ 2.76”

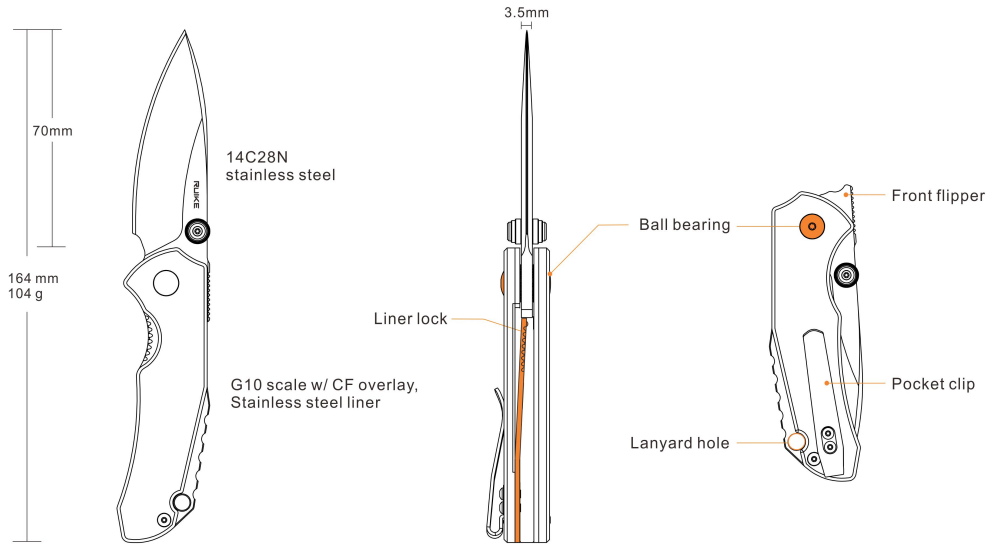
Blade Thickness: 3.5mm/ 0.14"

Weight: 104g/ 3.67oz

Blade: 14C28N stainless steel (58~60HRC)

Handle Scale: G10 w/ carbon fiber overlay

Features:



Sandvik 14C28N Stainless Steel, Cryogenic Treatment

Sandvik 14C28N is a martensitic stainless chromium steel with a chemistry optimized for high quality professional knife applications which put very high demands on edge sharpness, edge stability and corrosion resistance. As to this knife, the 14C28N is intensively processed by RUIKE using quenching and cryogenic treatment, which features an ideal hardness of 58~60 HRC.

- G10 Knife Handle

G10 is a blend of fiberglass and resin, giving the knives the ability to withstand intense forces, preventing scrapes and general abrasion.
