Atom4

Instruction Manual

Userguide for All ATOM4 Chargers

OVERVIEW

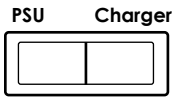

Input Voltage:	90~260VAC 50/60Hz
Input Current:	2.5A@100VAC
Operating Temperature:	0 ~ 45°C
Warranty:	1 Year

The next generation of the long-standing VL-MR range has arrived, perfectly compact; the ATOM charger surpasses its predecessor with its sleek robust design and lightweight properties whilst still maintaining the original specifications and 60w power supply.

MAINS INPUT

Suitable for worldwide use (90~260VAC).
These chargers are **CE marked** and have been designed to comply with all relevant safety/EMC Regulations.

The ATOM charger sequentially charges both channel groups (1-2 & 3-4).
If you would like to switch the ATOM unit to act as a MAINS PSU then use the switch available on the back of the unit to PSU.

L.E.D STATUS

○ ● ○	**Red** on	Standby
● ● ○	**Yellow** on, **Green** off	Charging
✹ ● ✹	**Yellow** & **Green** flashing	80~99% Charged
○ ● ●	**Yellow** off, **Green** on	Fully Charged
○ ✹ ○	**Red** flashing	Faulty

If your product shows signs of fault, please contact our repairs team on **+44(0)1233 638715**. We can also carry out any repairs regardless of Warranty.

Atom4 also comes in other variations to accommodate V-Lok, NP1, BP-U and Sticky Batteries.
