

JJC Z-ZV1F

Lens Cap

JJC Z-ZV1F Lens Cap is specially designed for SONY ZV-1F camera, providing essential lens protection and a hassle-free shooting experience.

The lens cap features a magnetic attachment system, making installation quick and effortless. Attach the included adhesive metal ring to the outer side of the lens filter thread, then magnetically snap the lens cap onto the metal ring. Rotate the lens cap counterclockwise and the built-in blades automatically open. It allows you to immediately capture stunning images without removing the cap. This ingenious design enables seamless shooting without the worry of misplacing the lens cap ever again. Conversely, rotating it clockwise closes the blades, providing instant protection against dust, moisture, and scratches.

The lens cap is constructed from premium-quality and environment-friendly ABS material, ensuring exceptional sturdiness and durability for long-lasting performance.

Additionally, JJC Z-ZV1F Lens Cap is compatible with JJC $\phi 40.5\text{mm}$ filters (sold separately), enhancing its versatility and providing more comprehensive protection for your lens.

All our products have undergone multiple inspections to ensure their quality. It is worth your trust.

Note:

1. Gently attach the lens cap to the metal ring and adjust its position slightly to keep it centered, ensuring no vignetting occurs.
2. To avoid vignetting, you can install the $\phi 40.5\text{mm}$ filter before attaching the lens cap.
3. Please do not use the macro LED light with the lens cap attached, as it may cause shadows in the photo.

Product Highlights

- **Effortless Installation:** Experience the magic of our magnetic attachment system. Installing the lens cap is now quicker and easier than ever before. Attach the adhesive metal ring to the outer side of the lens filter thread and magnetically snap the lens cap onto the metal ring. It's that simple! Spend less time fiddling with your gear and more time capturing amazing shots.
- **Seamless Shooting, Maximum Protection:** With a quick counterclockwise rotation, the built-in blades automatically open, allowing you to seize breathtaking moments without removing the cap. No more missed opportunities or worries about misplacing your lens cap. Conversely, a gentle clockwise rotation securely closes the blades, providing instant protection against dust, moisture, and pesky scratches.
- **Premium-Quality Materials:** Your lens deserves the best, and our lens cap delivers just that. Crafted from premium-quality and environment-friendly ABS material, it guarantees exceptional sturdiness and durability, ensuring a long-lasting performance that withstands the test of time.
- **Enhanced Versatility:** Expand your creative horizons with ease! The lens cap is compatible with JJC ϕ 40.5mm filters (sold separately), offering additional protection for your precious lens while providing room for creativity. Now you can explore new styles and effects without any worries.
- **Top-Tier Quality:** Quality is at the core of everything we do. Our product undergoes rigorous inspections, so you can trust that you're getting nothing less than the best. We take pride in delivering a product that lives up to your expectations.
