DIMENSIONS & WEIGHT CAPACITY

Rated weight capacity is 2.2lbs~19.8lbs(1~9kg) for the mount.

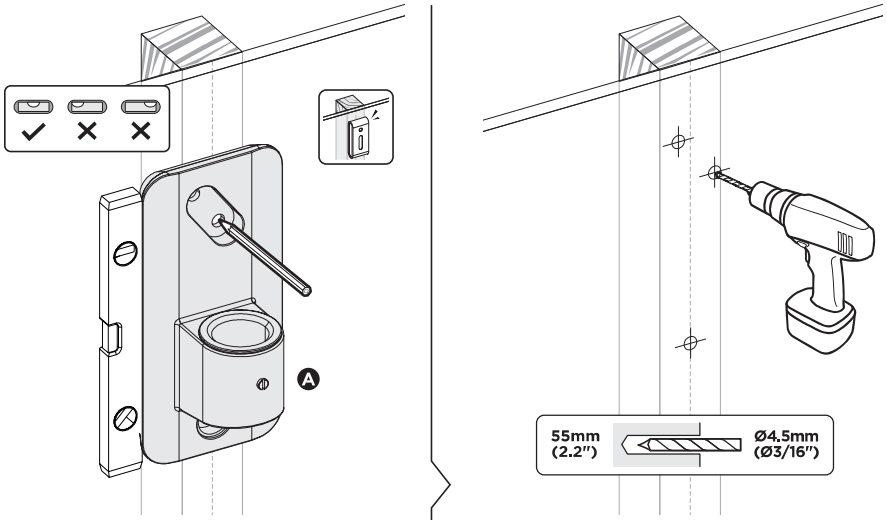

Caution:

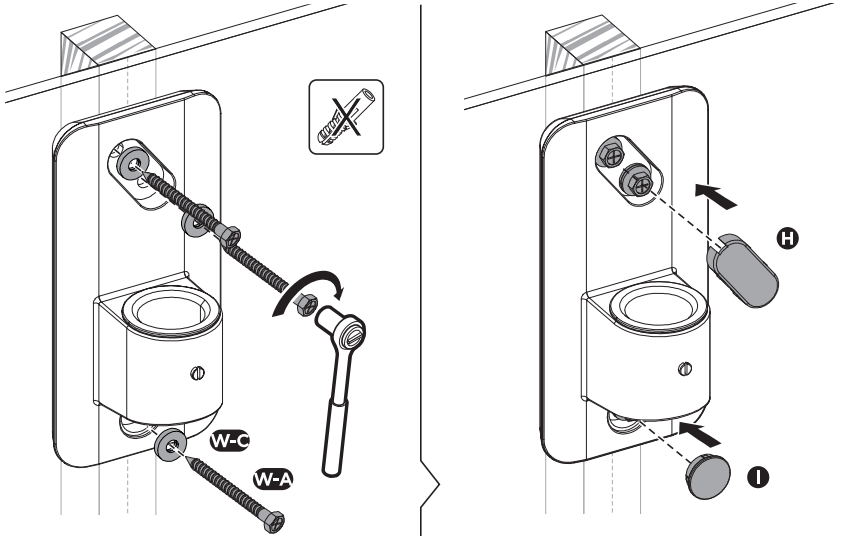

Ensure all mounting surfaces are capable of holding the weight of your mount.
DO NOT EXCEED MAXIMUM LISTED WEIGHT CAPACITY.
SERIOUS INJURY OR PROPERTY DAMAGE MAY OCCUR!

Step 1a

Wood Stud Mounting Option

• With a stud finder locate the stud and center the Wall Mount (#A) on the stud at the desired height. Using a bubble level to ensure straightness mark the center of the mounting holes with a pencil.
• Use a 3/16” drill bit and drill on the marked locations to a depth of 2.2”. Secure the Wall Mount (#A) to the wall using the Lag Screws (#W-A) and Washers (#W-C). Tighten the screws until secure.
• Place the Decorative Covers (#H, I) onto the mount to cover the heads of the lag screws.

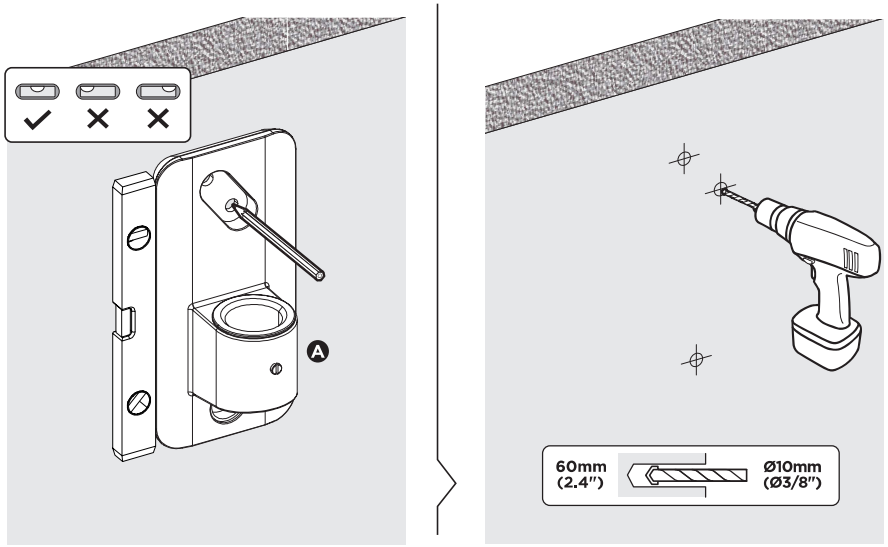

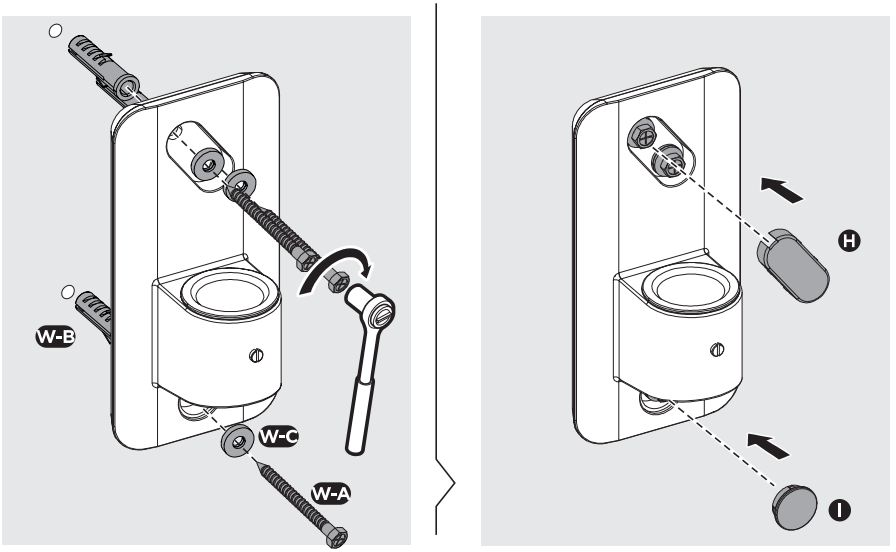

Step 1b

Concrete/Brick Mounting Option

• Using a bubble level to ensure straightness hold the Wall Mount (#A) to the desired location on the wall and mark the center of the mounting holes with a pencil.
• Use a 3/8” drill bit and drill on the marked locations to a depth of 2.4”. Clear any dust and debris from the holes and insert the Concrete Anchors (#W-B). Secure the Spring Arm (#A) to the wall using Lag Screws (#W-A) and Washers (#W-C). Tighten the screws until secure.
• Place the Decorative Covers (#H, I) onto the mount to cover the heads of the lag screws.

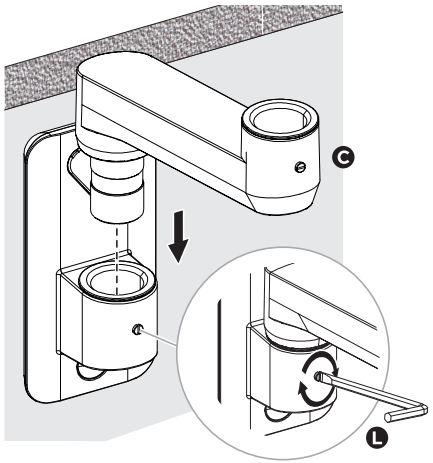

Step 2

Assemble the Arm

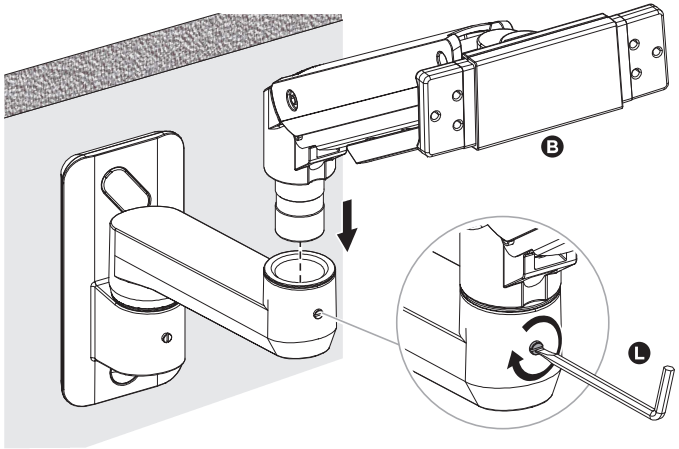

• Insert the Mount Arm (#C) into the wall mount, then partially tighten the set screw so that the arm cannot be removed from the joint.

Step 3

Assemble the Arm

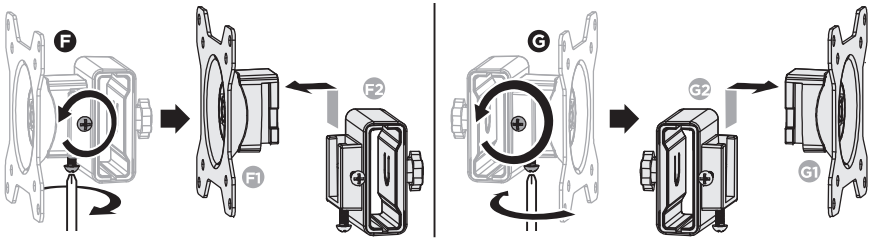

• Insert the Spring Arm (#B) into the arm joint, then partially tighten the set screw so that the arm cannot be removed from the joint.

Step 4

Separate the VESA Plates

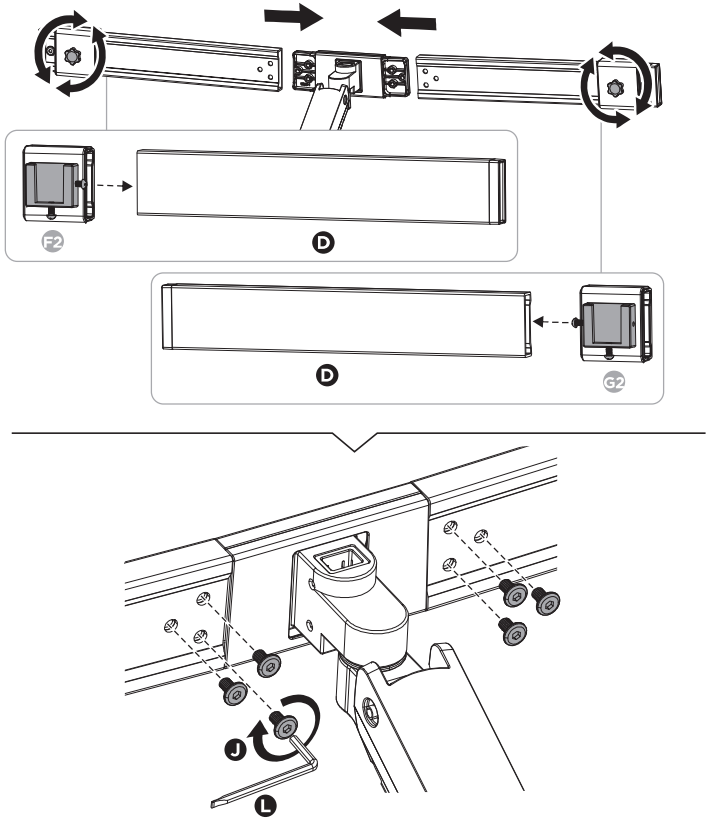

• Loosen the bolts on the side and bottom of the VESA Mounts (#F, G) until the VESA plate separates from the sliding bracket.

Step 5

Attach the Rails

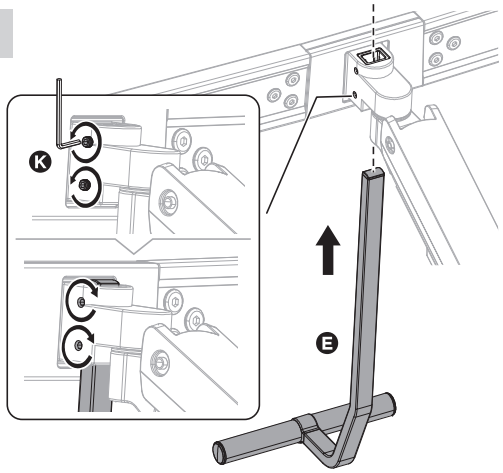

• Slide the brackets from the VESA Mounts onto each of the Horizontal Rails (#D) in the orientation shown here. Place the Horizontal Rails (#D) onto each side of the Spring Arm.
• Secure the Horizontal Rails using the Bolts (#J) and tighten until secure.

Step 6

Attach the Handle

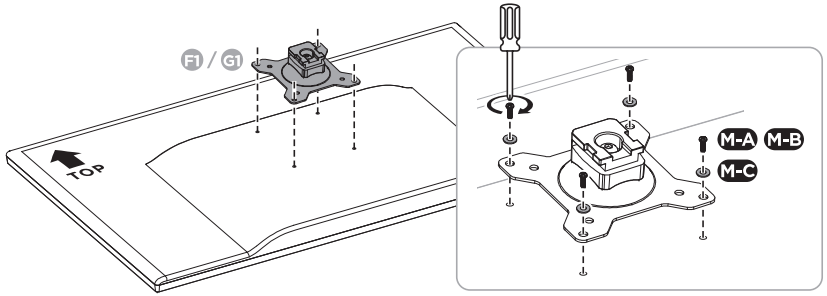

• Insert the end of the handle into the hole near the center joint, then tighten the set screws to secure the handle in place.

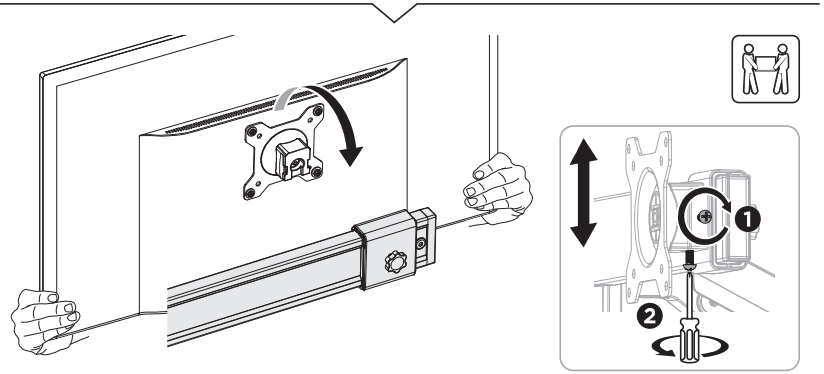

Step 7

Attach the VESA Plate to the Monitor

• Select the appropriate size mounting bolt (#M-A, M-B) and washer (#M-C) for your display's mounting holes and verify the length of the VESA bolt is not too long. If you are unsure of the correct bolt size for your display refer to your TV user manual or contact the TV manufacturer for sizing information. Secure the VESA Plate to the monitor using the selected bolts.
• Hang the monitors onto the VESA mounts, then tighten first the side bolts, then the bottom bolt to secure the monitor to the mount.

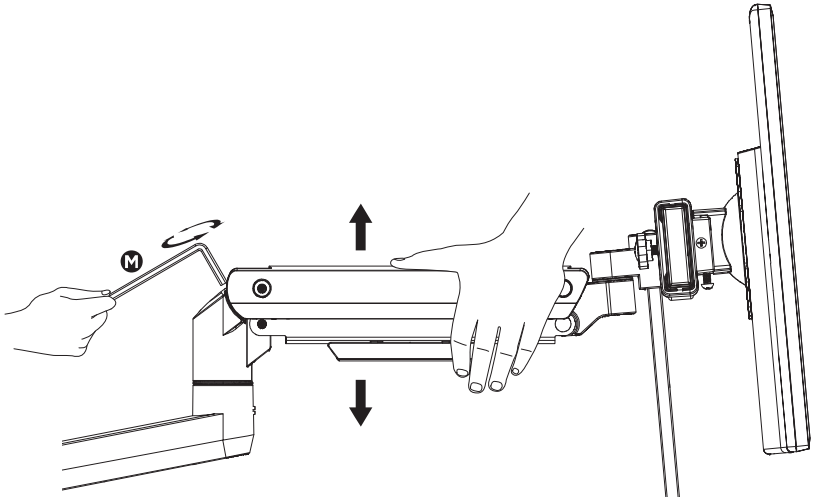

Step 8

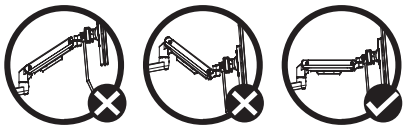

Weight Balancing the Gas Spring Arm

• Gas Spring tension may need to be adjusted to suit the weight of the monitors. To weight balance the two gas spring arms,begin by pushing the arm down to the lowered position,then use Hex Wrench (#M) to adjust the nut as pictured above, turning counterclockwise toward the + (plus) sign for heavier monitors, increasing the tension and clockwise toward the – (minus) sign for lighter monitors, lowering the tension. Adjust until the arm does notraise back to the highest position or sink to the lowest position when released. This might require multiple rotations to reach the desired tension.

To properly balance the arm with monitor mounted, adjust the spring tension using the supplied Allen Key as follows:

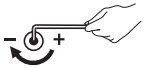

First, position and firmly hold the arm horizontally as shown. Ask for assistance should you require it.

***CAUTION:** To avoid damage to monitor or mount, always keep the arm in a horizontal position while making adjustments. Again, ask for assistance if required.*

*If the arm **drops,** turn the adjustment screw counter-clockwise until it stays in a horizontal position.*

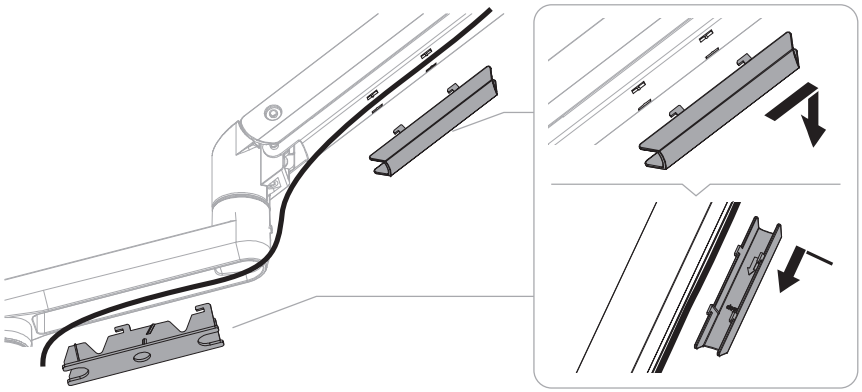

*If the arm **rises,** turn the adjustment screw clockwise until it stays in a horizontal position.*

CAUTION:
***DO NOT** over tighten the screws.*

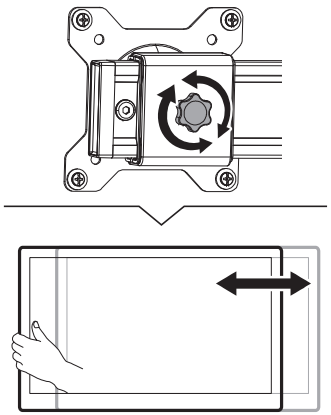

Step 9
Cable Management

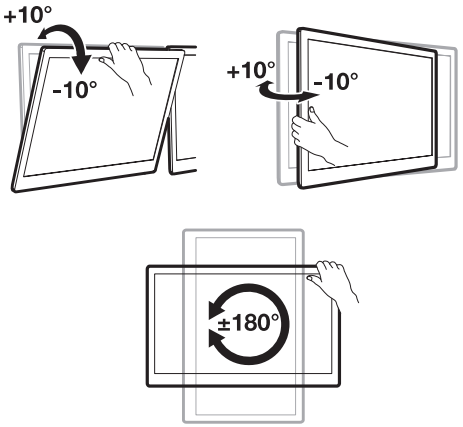

• Remove the cable management covers from the underside of the mount arms sliding the covers forward toward the VESA plate, then away from the arm. Run any cables beneath then reinstall the cable management cover.

Step 10
Final Adjustments

• To adjust the spacing of the monitors loosen the knobs on the back of the VESA Mounts, move the screen into position, then tighten the knobs again.
