POLSEN®

THANK YOU FOR CHOOSING POLSEN.

The Polsen XP-30D adds 30 dB of clean gain to any low-output dynamic or ribbon mic that needs a little extra gain boost before it reaches the input of your preamp or mixing board. Its XLR input and output make it simple to set up, and it operates on 48 V phantom power but doesn't pass it through to protect sensitive ribbon mics from damage. The XP-30D's metal construction and compact size are made for travel, and it will stand up to live shows and repeated use when recording.
