

Carry Bag

for Wireless System

WSB-1S

Fits single wireless
microphone system

Foam cutouts for receiver,
transmitter, and
handheld microphone

Front access to receiver
controls

Compartment for carrying
lavalier mics, batteries,
and accessories

Back zippered opening for
cabling

Inserting a Receiver

Remove the spacer's adhesive cover and press the spacer onto the bottom of your receiver.

Fold down the touch-connect straps over the top of the receiver.

Insert the receiver into the slot.

Push the straps through the strap tie-down holes, pull them until tight, and press them down onto the touch-connect strip.

Antennas and Power Cables

Use the back compartment to attach antennas.

Unzip the back opening to connect power and microphone cables.

Remove the spacer cube if additional space is needed in the accessory compartment or for a long transmitter antenna.

Fold back the top flap and attach it to the touch-connect strips on the back of the case for access to controls, cabling, and antennas.

Specifications
