Lens Hood Compatibility Chart

Vello Lens Hoods

Vello lens hoods are primarily designed to prevent unwanted stray light from entering the lens, by extending and shading the end of the lens. In addition, since the end of the lens is extended, you also get the added benefit of some extra protection from accidental impact.

Some Vello lens hoods feature a convenient "Snap-on" connection for quick and easy on and off action.

There are hoods for particular lenses, and models that will fit a selection of lenses.

Some are based on filter thread size. They can be used with any lens that has a matching thread size (e.g. 52mm) with internal focus.

Hoods that are crafted for specific lenses have the advantage of being tailored to perfectly match the exact focal length of the lens for which they were designed.

Vello lens hoods are precision engineered to provide maximum glare reduction and hood coverage while requiring the minimum amount of weight and hood area. Many hoods are designed to be reversed and stored with the lens when not in use. These hoods can also accept lens caps.

*Vello ET-86W For Canon EF 70-200mm f-2.8L IS
Dedicated lens hood*

*Vello 52mm Snap-on Tulip Lens Hood (Version II)
Fits lenses with 52mm thread*
